

September, 2000

To: Alex Fedorov, B.Sc., B.S.

This is a personal and professional commendation for the special opportunity I have had to receive individualized treatment with your expert care. I'm one of those fortunate patients you have diagnosed with skill and a view for the health of the whole person. You have the training and talent needed to motivate and challenge your patients beyond the adjustment sessions in the clinic.

You are truly a Doctor of Chiropractic and an energetic Teacher of Chiropractic with your patients. Each session I have had (for only three months) has been an experience of total dedication on your part. You may need to realize what a rich gift you share with intelligence, dedication, and energy, to the point of giving extra time for rehabilitation exercises that strengthen the body for daily life. I have personally received your instructions for at least twenty daily exercises to help build muscular strength and increase range of motion. This is highly appreciated and gives me the best chance to maintain future health.

I have been a professional teacher for at least thirty years and can easily recognize your talent as a teaching doctor. I sincerely appreciate your teaching skills and know that any patient under your care will learn about overall wellness and increased health. You have taken special time during our sessions to share text book diagrams, current medical research, and nutritional advice. I have been blessed with your encouragement to use the enzyme Bromelain as an anti-inflammatory agent and an aide to heal the muscle strain I experienced in walking.

Best wishes go with you as you begin your own private practice. As you treat more new patients, their words will encourage others to discover the rewards of chiropractic care. Perhaps one day I will have the opportunity to visit your own office again and share in your success. You have special gifts in your hands and your treatment to heal the whole person. You have blessed my life with your professional care and personal concern. You are truly a very talented and highly skilled doctor. You can contact me at [REDACTED] for support and let me know the future address of your chiropractic office. I look forward to visiting you in the United States and/or Canada. You deserve the very best in your personal and professional life!

With sincere appreciation and gratitude,

H. Kay [REDACTED], life-long teacher and student
